RESEARCH FIELDS Macroeconomics, Growth and Development, Economic History, Applied Economics.

EDUCATION York University, Toronto, Canada
Ph.D., Economics, June 2025.
 • Dissertation Title: “Three Essays on Cambodia’s Post-Genocide Development.”
York University, Toronto, Canada
M.A., Economics, 2018.
York University, Toronto, Canada
B.A., Economics, 2017.

ACADEMIC APPOINTMENTS

Postdoctoral Fellow, CERDI, Université Clermont Auvergne, France, November 2025 – Present

- Conduct econometric analysis of field survey data to assess the impact of termite mounds on agricultural productivity and input use.
- Evaluate effects on household welfare, including living conditions, healthcare expenditures, and well-being.
- Design and facilitate participatory workshops to co-develop conservation strategies with local communities.
- Coordinate with French and Cambodian partners and maintain engagement with local stakeholders in Cambodia.
- Disseminate findings through academic publications, policy briefs, and development of economic indicators for sustainable management.

RESEARCH PAPERS

Work in Progress

- Termite Mounds, Input Allocation, and Agricultural Misallocation.
- Soil Quality and Within-Farm Input Allocation: Evidence from Rice Farming and Termite Mound Density.

Working Paper

- The Gender Composition of the Cambodian Agricultural Workforce.
- The Effect of Being Born in Urban Areas During the Cambodian Genocide.
- The Demographic and Economic Effects of the Cambodian Genocide.

CONFERENCES

- Royal University of Agriculture Research Seminar, Phnom Penh, Cambodia, May 2026 (Presenter).

- Canadian Economics Association Annual Meeting, Toronto, Ontario, May 2024 (Presenter).

TEACHING

Undergraduate level

- Introductory Mathematical Economics I (1st year course)

RESEARCH ASSISTANT

Graduate level, Jan 2018 – Aug 2024

- Conducted detailed socioeconomic and demographic analysis using regression models to evaluate economic trends, contributing to academic reports.
- Extracted and analyzed geospatial data with QGIS; created variables from TIFF files and incorporated environmental indicators such as elevation, precipitation, temperature, and calorie suitability index.
- Processed and analyzed FAO GAZE agricultural datasets; developed country-level mapping for the USA, including measurement of distances from major geographical features such as the Mississippi River.
- Applied econometric techniques to assess Cambodia's post-genocide recovery, focusing on labor force dynamics and GDP growth.

TEACHING ASSISTANT *Undergraduate level*

- Introductory to Microeconomics and Macroeconomics (1st year course)
- Introductory Mathematical Economics I and II (2nd year course)
- Intermediate Microeconomic Theory I and II (2nd year course)
- Intermediate Macroeconomic Theory II (2nd year course)
- Managerial Economics and Strategy (3rd year course)

AWARDS AND FELLOWSHIPS

- Faculty of Graduate Studies 60th Anniversary Award, York University, 2025
- York Graduate Scholarship and Fellowship, 2017 – 2024
- Faculty of Graduate Studies Academic Excellence Fund, 2023
- York Dissertation Fieldwork Fellowship, 2021 – 2022
- Nichol Ma and Ruth Dorey Scholarship, 2016

OTHER SKILLS

- Econometric analysis: OLS regression, 2SLS regression (instrumental variable methods), panel data analysis, impact evaluation (including event study), simulation modeling
- Statistical software: STATA (advanced), MATLAB (proficient)
- Geospatial analysis: QGIS (data extraction, mapping, integration of environmental indicators)
- Survey data management: Large dataset cleaning, processing, and analysis
- Data visualization: Mapping, presentation of quantitative findings
